COMMITTED  
TO  
WOMEN'S  
HEALTH

## *Committed To Your Patient's Health*

Interscope Pathology has been serving physicians and their patients in the Los Angeles area since 1975.

We are committed to you and your patients, and

we understand that when making a choice about what laboratory to use, accuracy, turn-around time and accessibility to a pathologist for consultation is imperative. Women's health has long been a focus of Interscope Pathology, and all of our staff have extensive experience in this area of pathology.

You, your staff, and your patients will receive unparalleled service from Interscope Pathology. You will get biopsies and PAP results in 24 to 48 hours and our pathologists are available around the clock for consultation. Help with billing issues is provided to you and your patients by our own staff.

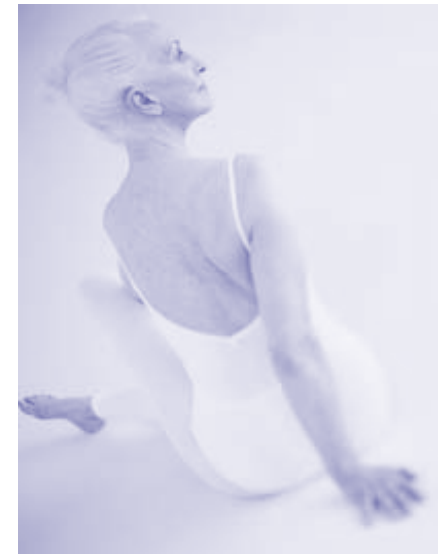

In our commitment to provide rapid turn-around time and accurate results, we have invested in state-of-the-art laboratory equipment. Interscope Pathology was among the first laboratories to offer the Cytoc liquid-based ThinPrep™ PAP test, and we have upgraded this technology with the Cytoc Imaging System. Our extensive experience with this technology has earned us the distinction of being a certified training facility for Cytoc.

## Testing Menu:

- ThinPrep® PAP using the Cytoc digital imaging system
- HPV Dygiene™ test
- Conventional PAP
- Herpes Test by Tzank Smear
- Chlamydia Test by DNA (from ThinPrep®)
- Gynecologic Biopsies
