

OUR PROFESSIONAL STAFF

ALAN S. BRICKLIN, M.D. - Co-Founder and Director of Interscope Pathology. Dr. Bricklin brings 30 years of experience as a Board Certified pathologist to the laboratory. He has a wide range of knowledge and his subspecialty interests are in Gastrointestinal and GYN pathology.

WILLIAM J. COLBURN, M.D. - Founder of Mammocore and Co-Founder of Interscope Pathology. Dr. Colburn is a recognized expert in breast pathology. He was a co-founder of the Van Nuys Breast Center, established in 1981. This was the first facility of its kind, a free-standing full-service breast center. He has continued to be a leader in breast cancer pathology and has authored over 50 primary articles/abstracts and book chapters, as well as consulting on cases from breast centers across the country.

BRYAN T. LIN, M.D., Ph.D. - Joined the group in 1997 and has played an important role in providing a full spectrum of surgical pathology expertise and implementing new diagnostic procedures. Dr. Lin was fellowship-trained with leading breast and gastrointestinal pathologists at Beth Israel Hospital and Harvard Medical School. His subspecialty fellowship was at City of Hope, focusing on Hematopathology and diagnosing head and neck, soft tissue and gynecologic cancers.

MAMMOCORE

COMMITTED
TO
PATIENT CARE

**WE CARE ABOUT YOU
THE WAY YOU CARE
ABOUT YOUR PATIENTS**

Mammocore's purpose is to provide unparalleled service to radiologists at imaging centers across the country. We are dedicated to the diagnosis of neoplastic and non-neoplastic diseases of the breast.

Mammocore has a state-of-the-art laboratory and four full-time pathologists with 10 to 30 years of clinical experience in the diagnosis of breast cancer. The founder of Mammocore, William J. Colburn, MD, was a co-founder of the Van Nuys Breast Center, which was the first free-standing full service breast center in the continental United States.

You can be confident your biopsies are being diagnosed by an exceptional group of pathologists. Dr. Colburn, with over 25 years of experience in diagnosing and consulting on breast biopsies, works with a team of exceptional pathologists who he has trained in breast pathology.

We understand that when making a choice about what laboratory to use, there is more to consider than accuracy alone. Turn-around time and accessibility of a pathologist for consultation are also of prime importance. You will receive biopsy results in 24 to 48 hours by means of a comprehensive pathology report faxed to your office and you will have easy access to our pathologists for consultation. If requested we will also fax a report to the referring physician as an additional service.

Mammocore Founder William J. Colburn, M.D.

Dr. Colburn is a recognized expert in breast pathology. He was a co-founder of the Van Nuys Breast Center, established in 1981. This was the first facility of its kind, a free-standing full service breast center. He has continued to be a leader in breast cancer pathology and has authored over 50 primary articles/abstracts and book chapters, as well as consulting on cases from breast centers across the country.

- USC School of Medicine
